

A Camping Trip

Last Saturday, Dave went camping with his friends, Tom, Jason, Sophia. They want to do stargazing, so they chose Sai Kung as there were less light pollution. They were on cloud nine.

They were amazed by the view when they arrived at the campsite. It was stunning. They immediately set up the tent. They were exhausted after doing so and decided to have lunch. They bought takeaway food, but they just threw away the container after savoring them. That made the country park full of rubbish, such as boxes around the grassland, cans in the river. It was polluting the environment badly.

After they finished having a barbecue, they decided to do stargazing. It was pretty amazing to see the shining stars around the sky. After an hour, they were fatigued and decided to sleep. However, just before they went back to the tent, something caught Dave's attention, he heard someone sobbing. He immediately turned around and saw a fairy. The fairy wiped her tears and said, "Please stop destroying the animal's habitat, they have nowhere to live!" Dave felt sorry for the fairy and he asked, "How can I help?" The fairy replied, "Unless you reduce waste, the animals will be sick, also deteriorating the environmental problems."

Dave immediately agreed. Later that night, the fairy led Dave to pick up rubbish in the woods. Suddenly, Dave tripped over a bottle and fell into a huge hole. Dave

was petrified. He called out to the fairy. The fairy flew over to him without a second thought. However, the fairy wasn't strong enough to pull Dave up and if she uses her magic, it will hurt Dave. Therefore, the fairy flew to their tent and told Tom, Jason and Sophia what happened to Dave - They were eager to save Dave. Finally with their help, Dave was back on the surface again. He was very grateful. They leaded to pick up rubbish tomorrow as it was already dark.

From this incident, Dave learnt not to litter as it will destroy the environment and may cause accident.
